

FOREST HABITAT PROJECT 2015

The Department of Game & Inland Fisheries is conducting timber harvests on the Chickahominy WMA. These harvests total 335 acres in 8 units identified in the map below.

This work will improve wildlife habitat and help ensure the continued health of this forest. We expect these harvests to be complete by late October/early November although weather conditions can affect this timeline. Please contact the DGIF Regional Office at 804.829.6580 for more information.
